-An Ethical Hacking Workshop

Description:

In this workshop we will explain following topics: -

1. Anonymity
2. Tor
3. Storm breaker
4. Sql Injection
5. Password Cracking

Requirements:

- Everyone should have their only laptop with a minimum of 8 GB of RAM.
- Should carry one empty pen drive with a minimum memory of 8 GB.
- Carry your own charger for the device you are bringing to the workshop.
- Carry your own bottle.

Outcome:

You will likely learn how to protect your identity and online activities through anonymization techniques like Tor. Understanding SQL Injection will help you recognize and prevent vulnerabilities in web applications that could lead to unauthorised database access. Similarly, learning about Password Cracking will provide insights into how attackers can exploit weak passwords, enabling you to create more secure passwords and protect against such attacks.

Instruction:

- Report on time on the day to collect the material for the workshop.
- While in the lab, you should take care of college property. If any damage is done, you are responsible for it.
- Doubts are always welcome. Feel free to ask during the session.

(Note:If any queries or any issues regarding workshop please do contact us from contact provided on poster)
